

SOURCE PACKET

PRELIMINARY U.S. ELECTION SECURITY RISK ASSESSMENT

Risks, Vulnerabilities, and Threat Vectors Affecting the U.S. Electoral Process

SOURCE PACKET 2026-02B

Supports Preliminary Intelligence Assessment 2026-02, dated 18 July 2026, 29 pages. This packet is the controlled evidentiary record for the reviewed draft and incorporates the prior PRC source packet by reference where noted.

CONTROLLING DISCLAIMER

This document and the products or outputs it summarizes were generated through Collaborative use of the Tornberg Analyst GPT, the Tornberg Consulting Methodology, and the Tornberg Analytic Framework. This document and its contents do not represent any analytic finding and are not approved for independent release.

DRAFT FOR REVIEW, COORDINATION, AND REVISION

18 JULY 2026 | PUBLIC-SOURCE AND CONTROLLED-REFERENCE MATERIALS

0. Document Status and Packet Guide

STATUS

This packet records the material sources considered, how each source was characterized, the evidentiary use permitted, source dependencies, de-duplication and deconfliction decisions, claim dispositions, contradictions, data transformations, file-integrity records, and unresolved audit requirements. It is complete for the sources materially used or materially rejected in the current draft record. It is not a representation that every case, jurisdiction, or relevant source in the United States has been collected.

FIELD	CONTROLLED STATEMENT
Supported product	Preliminary Intelligence Assessment 2026-02; 18 July 2026; 29 pages; SHA-256 c089c9a4d98788b6cc0deb691ce4b9c3dd4b95b1cf24453b810690f7ad651705.
Packet identity	Source Packet 2026-02B. Companion process summary: Process Summary Report 2026-02A.
Audience	Accountable analyst, source auditor, coordinating reviewers, legal and technical reviewers, red-team reviewers, publication authority.
Evidence scope	Public, official, judicial/prosecutorial, technical, academic, investigative, advocacy/commercial, prior controlled products, and uploaded data. No classified or privileged access.
Review status	User completed a first-pass review with minor edits. Full independent source audit, legal review, technical review, red-team review, tradecraft compliance review, and release approval remain outstanding.
Handling	Draft; not for external distribution or citation as an approved Tornberg Consulting or government product.

How to use this packet

- Use Part 2 to see which sources support the six principal judgments.
- Use Part 3 to trace each of the 15 threat vectors to its supporting and limiting evidence.
- Use Part 4 for the complete source register and source-level limitations.
- Use Part 5 for the separate Source De-duplication, Deconfliction, and Disposition Register requested for this production.
- Use Part 6 for rejected, corrected, and quarantined claims.
- Use Parts 7-10 to reproduce data handling, verify controlled files, understand AI assistance, and identify remaining audit work.

Packet contents

1. Governing source controls and vocabularies
2. Principal judgment-to-source crosswalk
3. Threat vector-to-source crosswalk
4. Complete source register
5. Source De-duplication, Deconfliction, and Disposition Register
6. Corrections, rejections, and quarantine register
7. Data and transformation record
8. Material assumptions, contrary evidence, and information gaps
9. Controlled-file integrity and archival register
10. AI, automation, review, and audit record
11. Appendix A. Governing and companion references

1. Governing Source Controls and Vocabularies

AUDIT STANDARD

A competent authorized reviewer using this packet should be able to identify the source behind each principal judgment, distinguish independent evidence from derivative repetition, reproduce the material dataset calculations, locate rejected or corrected claims, and explain any disagreement without first guessing how the source was treated.

1.1 Controlling evidence rules

1. Evidence precedes assessment. Every material factual proposition and judgment must be traceable to an identified source or clearly marked inferential basis.
2. Fact, observation, reported information, inference, assessment, warning, and recommendation are not interchangeable.
3. Vulnerability, attempt, access or transaction, acceptance, count or operational effect, certification effect, and outcome effect are separate stages.
4. Source type, provenance, access, date, definition, and method affect evidentiary value.
5. Repetition is not corroboration. Reports sharing the same author, dataset, source file, investigation, official product, or reporting chain remain one stream unless independent evidence is demonstrated.
6. Government action is not automatically independent corroboration when the action was triggered by the same originating evidence.
7. Legal disposition is metadata. Analytic weight comes from the underlying records, admissions, communications, technical evidence, and alternatives.
8. Quantitative claims require a defined numerator, denominator, unit, period, inclusion rule, de-duplication method, and error treatment.
9. A source may be accurate for a narrow proposition while being unusable for prevalence, intent, coordination, or effect.
10. Unresolved leads are preserved through boundary or quarantine rather than silently discarded or promoted.
11. Confidence is proposition-specific and is not a substitute for likelihood, impact, or prevalence.
12. Later evidence may refine or correct a judgment, but may not silently rewrite what a source established at its original time and evidence stage.

1.2 Evidence status vocabulary

STATUS	MEANING
SUPPORTED	The source directly supports the bounded proposition stated.
SUPPORTED / BOUNDED	The source supports part of the proposition; downstream intent, scale, coordination, effect, or generalization remains inferential.
DIRECTLY OBSERVED	A participant, recording, or contemporaneous artifact captures conduct; legal disposition and broader context may remain unresolved.
OFFICIAL ALLEGATION	A charging, complaint, warrant, or investigative record contains the allegation; weight depends on underlying evidence and disposition.
CONTEXT	The source informs capability, doctrine, controls, priors, law, or collection but does not establish the event under assessment.
CORRECTED	Evidence supports a narrower formulation and contradicts or fails to support a broader claim.
QUARANTINED	The lead remains relevant, but provenance, definitions, independence, method, calculation, or bridge evidence is insufficient for definitive use.

1.3 Disposition vocabulary used in the requested record

DISPOSITION	APPLICATION
RETAINED	The source or claim was admitted for the specifically stated proposition and may support the product within its explicit limitations.
BOUNDARIED	The source or claim was retained only for a narrower purpose, such as context, methodology, discovery, warning, within-dataset description, or falsification. Broader uses were excluded.
REJECTED	The source or claim was excluded from substantive support because it failed traceability, methodology, definition, independence, calculation, evidence-stage, or falsification tests. It remains visible for audit.
MIXED	Different claims from the same source received different treatment. The record states the retained boundary and rejected use separately.

1.4 Source class and confidence controls

Source authority does not remove the need for proposition-specific testing. Official data may be strongest for administrative scale but weak for undetected prevalence. Investigative video may be strongest for directly observed conduct but weak for national

scale. Advocacy and commercial analyses may reveal a credible vulnerability while remaining unsuitable for exact national counts. Prior controlled products may preserve a well-audited evidence package but do not independently corroborate themselves.

2. Principal Judgment-to-Source Crosswalk

ID	PRINCIPAL JUDGMENT	MATERIAL SOURCES	EVIDENCE BASIS	CONFIDENCE CONTROL
PJ-01	Multiple election-security vectors are real and warning-relevant; one validated exploitation event establishes operational exploitability, not prevalence or effect.	EAC-01; DOJ-01; DOJ-02; OK-01; DB-01; FMI-01; FMI-02; TB-PRC-01	Official cases, direct observation, controlled case corpus, official threat reporting, prior PRC synthesis.	High for vector existence; national scale and effect remain unresolved.
PJ-02	Pre-entry registration and eligibility assurance is under-standardized; controls should test legally material criteria while preventing improper exclusion.	EAC-01; EAC-06; EAC-08; EAC-09; EAC-10; DOJ-03; DOJ-04; USCIS-01; FVAP-01; MIT-01	Official administrative/legal guidance, system descriptions, and matching methodology.	Moderate-high; legal implementation varies and no national control-performance census exists.
PJ-03	Paper records are widespread, but paper availability is not equivalent to independent outcome assurance.	EAC-01; EAC-02; EAC-03; EAC-04; EAC-05; EAC-07; NAS-01	Official administrative data, audit policy, technical guidance, and consensus study.	High for paper coverage and uneven audit framework; lower for current jurisdiction-level performance.
PJ-04	Technology improves capacity but creates concentration, credential, vendor, logging, software, and common-mode failure risk when it is the sole source of proof.	EAC-04; EAC-07; NIST-01; NAS-01; FMI-01	Official standards/guidance and independent consensus study.	High for vulnerability logic; successful count alteration is not established.
PJ-05	Foreign actors can exploit data, process weaknesses, domestic disputes, and public uncertainty without altering recorded votes.	FMI-01; FMI-02; TB-PRC-01; TB-SOURCE-01; NCSL-01	Official foreign-influence products and prior controlled PRC evidence package.	Moderate-high for capability and recurrent influence pathways; direct vote alteration not established.
PJ-06	The evidence cannot reliably rank vectors by national frequency or undetected prevalence.	EAC-01; MIT-01; DB-01; FVF-01; TIL-01; TIL-02; PILF-01; BRAD-01; GIT-01; ZIP-01; FACT-01; DHS-01; NC-01; MI-01; MI-02	Dataset limits, methodological sources, rejected aggregators, and direct falsification records.	High that present evidence is insufficient for a defensible national ranking.

Crosswalk lists material sources, not every contextual reference. Source-level permitted use and dependence are controlled in Parts 4 and 5.

3. Threat Vector-to-Source Crosswalk

ID	VECTOR	MATERIAL SOURCES	EVIDENCE MIX	CONFIDENCE BOUNDARY
TV-01	Voter registration and list integrity	EAC-01, EAC-06, EAC-10, MIT-01, OK-01, DOJ-02, DB-01, FVF-01, TIL-01/02, PILF-01	Official administration + directly observed/prosecuted exploitation + bounded matching leads	Existence high; national scale/effect low.
TV-02	Eligibility exploitation	EAC-08/09/10, DOJ-01/03/04, USCIS-01, FVAP-01, DHS-01, CENSUS-01	Official legal/admin context; DHS numerical claims quarantined	Existence high; national rate low.
TV-03	Identity misuse and impersonation	OK-01, DOJ-02, DB-01, EAC-06, NCSL-01, TB-PRC-01	Direct observation, official case, bounded case corpus, data-exposure context	Existence high; scale/effect low.
TV-04	Duplicate or double voting	DB-01, MIT-01, FVF-01, TIL-01/02, PILF-01, BRAD-01, NC-01	Bounded convictions/cases; matching methodology; claims corrected or quarantined	Existence high; prevalence unresolved.
TV-05	Absentee and mail-ballot exploitation	EAC-01, EAC-08, DOJ-01, DB-01, NAS-01, MI-01	National admin scale and control activation; documented cases; corrections	Existence high; scale/effect low-moderate.
TV-06	Vote buying, coercion, intimidation, paid registration	OK-01, DOJ-02, DOJ-01, DB-01	Direct observation + official case + bounded corpus	Existence high; scale/effect low.
TV-07	Petition, nomination, ballot-access fraud	OK-01, DOJ-02, DB-01	Direct observation, official action, bounded case corpus	Existence high; scale/effect low.
TV-08	Insider and trusted-access misconduct	EAC-01, EAC-07, NIST-01, DB-01	Workforce exposure, technical controls, bounded cases	Existence high; scale/effect low.
TV-09	Cyber compromise of election and campaign systems	NIST-01, EAC-07, FMI-01, FMI-02, TB-PRC-01	Official technical/threat sources and prior controlled synthesis	Attempts/capability high; count effect not established.
TV-10	Vendor, equipment, software, supply-chain compromise	EAC-04/05/07, NIST-01, NAS-01	Standards, paper evidence, technical guidance, consensus resilience logic	Vulnerability high; successful electoral effect low/not established.

ID	VECTOR	MATERIAL SOURCES	EVIDENCE MIX	CONFIDENCE BOUNDARY
TV-11	Physical custody, ballot stuffing, destruction, disruption	EAC-01, EAC-07, DOJ-01, DB-01	Administrative exposure, custody controls, bounded cases	Existence high; scale/effect low.
TV-12	Reporting, canvass, recount, certification disruption	EAC-02/03, NAS-01, FMI-01/02, MI-01, MI-02	Audit framework, official threats, direct corrective examples	Existence moderate; scale/effect low.
TV-13	Information operations and public-confidence attack	FMI-01, FMI-02, TB-PRC-01, TB-SOURCE-01, USA-01	Official threat assessment and prior controlled PRC evidence	Existence high; recurrence moderate-high.
TV-14	Illicit campaign finance and covert political support	DOJ-01, USA-01, FMI-02, TB-PRC-01, DB-01	Official offense categories and foreign-influence context; corpus incomplete	Existence moderate in current corpus; scale/effect low.
TV-15	Systemic, accidental, cascading failure	EAC-01, EAC-07, NIST-01, NAS-01, MI-01, MI-02	Administrative/technical context and official correction cases	Existence high; event-specific likelihood/effect unresolved.

4. Complete Source Register

REGISTER RULE

Each source record states what the source is permitted to establish and the use that remains excluded. Inclusion does not imply acceptance of every claim. URLs are controlled references and require final link and archive verification before release.

EAC-01 U.S. Election Assistance Commission. 2024 Election Administration and Voting Survey Comprehensive Report. 30 June 2025.

SOURCE CLASS: Primary official national administrative survey

PRIMARY USE: National exposure measures: registrations, transactions, voting methods, workforce, technology, ballot cure/rejection, and paper-record coverage.

EVIDENCE STATUS: SUPPORTED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Certified state and local submissions; definitions, completeness, and reporting capability vary by item and jurisdiction. Administrative measures are not fraud incidence.

INDEPENDENCE / DECONFLICTION: Primary data stream; EAC news releases and one-sheets derived from the same survey are not separate corroboration.

TRACEABILITY: Judgments: PJ-02, PJ-03, PJ-06. Vectors: TV-01, TV-05, TV-08, TV-09, TV-10, TV-11, TV-15.

PROVENANCE: Official PDF; direct access; accessed 18 July 2026.

Controlled reference: https://www.eac.gov/sites/default/files/2025-06/2024_EAVS_Report_508c.pdf

EAC-02 U.S. Election Assistance Commission. Election Audits Across the United States.

SOURCE CLASS: Official policy and administrative synthesis

PRIMARY USE: Variation in audit types and the absence of one national post-election auditing standard.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Describes law and practice; does not measure audit quality or performance nationally.

INDEPENDENCE / DECONFLICTION: Same institution as EAC-01 but a distinct policy synthesis; not independent evidence of implementation outcomes.

TRACEABILITY: Judgments: PJ-03. Vectors: TV-12, TV-15.

PROVENANCE: Official webpage; direct access; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/election-officials/election-audits-across-united-states>

EAC-03 U.S. Election Assistance Commission. Draft Voluntary National Election Audit Standards and 2026 hearing materials.

SOURCE CLASS: Official draft standard and public process

PRIMARY USE: Evidence of federal movement toward common voluntary audit principles.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Draft and voluntary; not proof of adoption or performance.

INDEPENDENCE / DECONFLICTION: Institutional policy development; not corroboration of specific jurisdictional controls.

TRACEABILITY: Judgments: PJ-03. Vectors: TV-12.

PROVENANCE: Official event/hearing materials; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/events/2026/02/18/eac-election-audit-standards-hearing>

EAC-04 U.S. Election Assistance Commission. Voluntary Voting System Guidelines and migration resources.

SOURCE CLASS: Official technical standards framework

PRIMARY USE: Federal certification generations, voluntary standards, and migration context.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Voluntary unless adopted by state law; legacy systems may remain in operation.

INDEPENDENCE / DECONFLICTION: Official standard; not evidence of universal implementation.

TRACEABILITY: Judgments: PJ-03, PJ-04. Vectors: TV-10, TV-15.

PROVENANCE: Official webpage; direct access; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/voting-equipment/voluntary-voting-system-guidelines>

EAC-05 U.S. Election Assistance Commission. Paper-based voting system resources and 2024 EAVS technology findings.

SOURCE CLASS: Official technical and administrative summary

PRIMARY USE: Paper ballot or auditable paper-record coverage and policy support.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Coverage figures derive from EAVS; paper availability does not establish voter verification, secure custody, or meaningful audit.

INDEPENDENCE / DECONFLICTION: Partly derivative of EAC-01; not counted as separate corroboration for EAVS figures.

TRACEABILITY: Judgments: PJ-03. Vectors: TV-10, TV-12.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/news/2025/05/28/eac-commissioners-issue-policy-support-paper-based-and-auditable-voting-systems>

EAC-06 U.S. Election Assistance Commission. Voter Lists, Registration, Confidentiality, and Voter List Maintenance.

SOURCE CLASS: Official administrative guidance

PRIMARY USE: Continuous list maintenance, voter-file privacy, and registration-process context.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Guidance does not replace state law or establish misconduct prevalence.

INDEPENDENCE / DECONFLICTION: Independent institutional synthesis relative to advocacy claims; underlying state rules may overlap with NCSL-01.

TRACEABILITY: Judgments: PJ-02, PJ-06. Vectors: TV-01, TV-02, TV-03, TV-04.

PROVENANCE: Official webpage; direct access; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/election-officials/voter-lists-registration-confidentiality-and-voter-list-maintenance>

EAC-07 U.S. Election Assistance Commission. Best Practices for Election Technology.

SOURCE CLASS: Official technical guidance

PRIMARY USE: Software-hash validation, audit logs, unique credentials, two-person control, custody, tamper evidence, and continuity.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Best-practice guidance is not evidence that jurisdictions implemented or effectively performed the controls.

INDEPENDENCE / DECONFLICTION: Distinct guidance; overlaps conceptually with NIST-01 and NAS-01 but not the same evidentiary origin.

TRACEABILITY: Judgments: PJ-03, PJ-04. Vectors: TV-08, TV-09, TV-10, TV-11, TV-15.

PROVENANCE: Official PDF; direct access; accessed 18 July 2026.

Controlled reference: https://www.eac.gov/sites/default/files/electionofficials/security/Best_Practices_for_Election_Technology_508.pdf

EAC-08 U.S. Election Assistance Commission. Best Practices on Provisional Voting.

SOURCE CLASS: Official administrative guidance

PRIMARY USE: Transparent, uniform provisional-ballot issuance, research, and resolution safeguards.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Guidance; state law determines eligibility and counting. Does not measure implementation.

INDEPENDENCE / DECONFLICTION: Distinct policy guidance; not evidence of actual provisional-ballot performance.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-02, TV-05.

PROVENANCE: Official PDF; accessed 18 July 2026.

Controlled reference: https://www.eac.gov/sites/default/files/document_library/files/EAC-Best-Practices-on-Provisional-Voting.pdf

EAC-09 U.S. Election Assistance Commission. Overview of Federal Election Laws.

SOURCE CLASS: Official legal orientation

PRIMARY USE: High-level HAVA, NVRA, UOCAVA, list-maintenance, and federal election-law context.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Orientation only; not a legal opinion or jurisdiction-specific authority.

INDEPENDENCE / DECONFLICTION: Same statutory substrate as DOJ-03 and FVAP-01; not separate corroboration of legal conclusions.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-01, TV-02, TV-05.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.eac.gov/election-officials/clearinghouse-resources-election-law-policy/overview-federal-election-laws>

EAC-10 U.S. Election Assistance Commission. National Mail Voter Registration Form.

SOURCE CLASS: Official form and instructions

PRIMARY USE: Documents current federal form fields, attestation, and state-specific instructions.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Form architecture does not itself establish verification practices or legal sufficiency in every jurisdiction.

INDEPENDENCE / DECONFLICTION: Primary administrative artifact.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-01, TV-02.

PROVENANCE: Official PDF; accessed 18 July 2026.

Controlled reference: https://www.eac.gov/sites/default/files/eac_assets/1/6/Federal_Voter_Registration_ENG.pdf

NIST-01 National Institute of Standards and Technology. VTS 200-1, Cybersecurity Framework Election Infrastructure Profile. January 2024.

SOURCE CLASS: Official consensus technical profile

PRIMARY USE: Cyber-risk management across registration, voting systems, supporting technology, and service providers.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Framework guidance; local implementation, coverage, and maturity vary.

INDEPENDENCE / DECONFLICTION: Independent federal technical institution; conceptually overlaps with EAC guidance but is not derivative of it.

TRACEABILITY: Judgments: PJ-04. Vectors: TV-08, TV-09, TV-10, TV-15.

PROVENANCE: Official PDF; direct access; accessed 18 July 2026.

Controlled reference: <https://nvlpubs.nist.gov/nistpubs/vts/NIST.VTS.200-1.pdf>

NAS-01 National Academies of Sciences, Engineering, and Medicine. Securing the Vote: Protecting American Democracy. 2018.

SOURCE CLASS: Authoritative consensus study

PRIMARY USE: Human-readable paper ballots, independent evidence, risk-limiting audits, and resilience logic.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Predates later technology and law changes; foundational analysis, not a current implementation census.

INDEPENDENCE / DECONFLICTION: Independent consensus body; separate evidentiary origin from EAC and NIST.

TRACEABILITY: Judgments: PJ-03, PJ-04. Vectors: TV-05, TV-10, TV-12, TV-15.

PROVENANCE: Published consensus report; direct access; accessed 18 July 2026.

Controlled reference: <https://nap.nationalacademies.org/catalog/25120/securing-the-vote-protecting-american-democracy>

FMI-01 CISA, FBI, and ODNI. Securing Election Infrastructure Against the Tactics of Foreign Malign Influence Operations. April 2024.

SOURCE CLASS: Joint official threat and mitigation guidance

PRIMARY USE: Foreign tactics, impersonation, synthetic content, information manipulation, and infrastructure mitigation.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Public warning product; underlying intelligence, source access, and full detection picture are not exposed.

INDEPENDENCE / DECONFLICTION: Joint official stream. Agency repetition of the same coordinated product is one evidence stream.

TRACEABILITY: Judgments: PJ-01, PJ-04, PJ-05. Vectors: TV-09, TV-12, TV-13, TV-14.

PROVENANCE: Official joint release; accessed 18 July 2026.

Controlled reference: <https://www.cisa.gov/news-events/news/cisa-fbi-and-odni-release-guidance-securing-election-infrastructure-against-tactics-foreign-malign>

FMI-02 Office of the Director of National Intelligence, Foreign Malign Influence Center. Primer on Foreign Malign Influence, Volume 2. October 2024.

SOURCE CLASS: Official intelligence-community public assessment

PRIMARY USE: Influence/interference distinctions, foreign tactics, domestic laundering, and post-voting targeting.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Public-level source characterization is limited; effect measurement and collection coverage remain opaque.

INDEPENDENCE / DECONFLICTION: Same broad official threat ecosystem as FMI-01, but a distinct product; possible shared intelligence reporting prevents automatic independence assumptions.

TRACEABILITY: Judgments: PJ-05. Vectors: TV-09, TV-12, TV-13, TV-14.

PROVENANCE: Official PDF; direct access; accessed 18 July 2026.

Controlled reference: https://www.dni.gov/files/FMIC/documents/products/10-18-24_Report_FMI-Primer-Vol-2-Public-Release.pdf

DOJ-01 U.S. Department of Justice. Election Crimes Branch.

SOURCE CLASS: Official prosecutorial orientation

PRIMARY USE: Federal election-crime categories, jurisdiction, and enforcement orientation.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Not a national incident, conviction, or prevalence dataset.

INDEPENDENCE / DECONFLICTION: Official orientation; does not corroborate individual case counts.

TRACEABILITY: Judgments: PJ-01. Vectors: TV-02, TV-05, TV-06, TV-11, TV-14.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.justice.gov/criminal/criminal-pin/election-crimes-branch>

DOJ-02 U.S. Department of Justice. California Woman Federally Charged with Paying Individuals, Including Homeless People, on Los Angeles Skid Row to Register to Vote. 18 May 2026.

SOURCE CLASS: Official charging and plea-agreement account

PRIMARY USE: Corroborates paid registration and false-address conduct captured by undercover video.

EVIDENCE STATUS: OFFICIAL ALLEGATION / SUPPORTED BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Bounded case; does not establish unlawful ballot casting/counting, national scale, or every broader recorded allegation.

INDEPENDENCE / DECONFLICTION: Legal action arose from the investigative evidence and is not wholly independent of OK-01; plea-agreement substrate materially strengthens the bounded conduct.

TRACEABILITY: Judgments: PJ-01. Vectors: TV-01, TV-03, TV-06, TV-07.

PROVENANCE: Official DOJ release and plea-account; accessed 18 July 2026.

Controlled reference: <https://www.justice.gov/opa/pr/california-woman-federally-charged-paying-individuals-including-homeless-people-las-skid-row>

DOJ-03 U.S. Department of Justice. National Voter Registration Act List Maintenance Guidance.

SOURCE CLASS: Official legal guidance

PRIMARY USE: Registration opportunity, list maintenance, timing, voter protection, and enforcement context.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Application is fact- and jurisdiction-specific; not a substitute for counsel.

INDEPENDENCE / DECONFLICTION: Official legal interpretation; overlaps statutory substrate with EAC-09.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-01, TV-02, TV-04.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.justice.gov/crt/nvra-list-maintenance-guidance>

DOJ-04 U.S. Department of Justice. Cases Raising Claims Under the National Voter Registration Act.

SOURCE CLASS: Official litigation and enforcement record

PRIMARY USE: Examples concerning materiality, voter-registration access, list maintenance, and improper rejection/removal.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Case-specific records; legal holdings and current applicability require counsel.

INDEPENDENCE / DECONFLICTION: Official case record; not independent of the statutory/legal framework it interprets.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-01, TV-02.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.justice.gov/crt/cases-raising-claims-under-national-voter-registration-act>

USCIS-01 U.S. Citizenship and Immigration Services. Systematic Alien Verification for Entitlements (SAVE).

SOURCE CLASS: Official system description

PRIMARY USE: Capabilities and limits of immigration-status verification available to authorized agencies.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: SAVE provides status information; it does not itself determine voter eligibility. Match quality and procedures require validation.

INDEPENDENCE / DECONFLICTION: Primary system description; related DHS summary claims may derive from the same system and are not independent.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-02.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.uscis.gov/save>

FVAP-01 Federal Voting Assistance Program. Uniformed and Overseas Citizens Absentee Voting Act (UOCAVA).

SOURCE CLASS: Official legal and administrative guidance

PRIMARY USE: Special registration and absentee-voting pathways for military and overseas citizens.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Orientation; implementation details and state procedures vary.

INDEPENDENCE / DECONFLICTION: Primary federal program guidance.

TRACEABILITY: Judgments: PJ-02. Vectors: TV-01, TV-02, TV-05.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.fvap.gov/info/laws/uocava>

MIT-01 MIT Election Data + Science Lab. Interstate Voter Registration Data Matching.

SOURCE CLASS: Academic methodological synthesis

PRIMARY USE: False positives, false negatives, field selection, thresholds, and ordinary causes of multiple records.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Does not validate any specific commercial or advocacy match total.

INDEPENDENCE / DECONFLICTION: Independent academic methodology source; not an independent replication of FVF, Tilores, PILF, or Heritage counts.

TRACEABILITY: Judgments: PJ-02, PJ-06. Vectors: TV-01, TV-02, TV-04.

PROVENANCE: Academic webpage; accessed 18 July 2026.

Controlled reference: <https://electionlab.mit.edu/research/interstate-voter-registration-data-matching>

NCSL-01 National Conference of State Legislatures. Access to and Use of Voter Registration Lists.

SOURCE CLASS: State-policy synthesis

PRIMARY USE: Variation in voter-file access, fields, confidentiality, and permissible use.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Secondary legal synthesis; current propositions should be checked against official state law.

INDEPENDENCE / DECONFLICTION: Independent institution but often synthesizes the same state statutes and rules as EAC-06.

TRACEABILITY: Judgments: PJ-05. Vectors: TV-03, TV-13.

PROVENANCE: Public policy webpage; accessed 18 July 2026.

Controlled reference: <https://www.ncsl.org/elections-and-campaigns/access-to-and-use-of-voter-registration-lists>

CENSUS-01 U.S. Census Bureau. Voting and Registration.

SOURCE CLASS: Primary federal statistical context

PRIMARY USE: Participation and registration denominators by demographic and geography.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Survey estimates; not evidence of individual fraud or election interference.

INDEPENDENCE / DECONFLICTION: Distinct survey system from EAVS; definitions and denominators are not interchangeable.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-02, TV-05.

PROVENANCE: Official statistical webpage; accessed 18 July 2026.

Controlled reference: <https://www.census.gov/topics/public-sector/voting.html>

USA-01 USA.gov. Report Voter Fraud, Voter Suppression, or Other Election Crimes.

SOURCE CLASS: Official public orientation

PRIMARY USE: Separates fraud, campaign-finance, intimidation, and civil-rights reporting pathways.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Orientation and referral information; not prevalence or adjudication data.

INDEPENDENCE / DECONFLICTION: Official orientation; does not independently corroborate incidents.

TRACEABILITY: Judgments: PJ-01. Vectors: TV-02, TV-03, TV-05, TV-06, TV-13, TV-14.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.usa.gov/voter-fraud>

OK-01 James O’Keefe. Testimony before the U.S. Senate Committee on Homeland Security and Governmental Affairs, 15 July 2026; underlying public video series.

SOURCE CLASS: Direct investigative observation and sworn testimony

PRIMARY USE: Paid-registration, false identity, petition, voter-data access, and worker-incentive pathways.

EVIDENCE STATUS: DIRECTLY OBSERVED / SUPPORTED BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: DOJ materially corroborates the Armstrong conduct; not every recorded actor or broader claim has a public final disposition.

INDEPENDENCE / DECONFLICTION: Testimony and videos are one investigative stream. DOJ-02 is partially dependent on the referral but adds official legal and plea evidence.

TRACEABILITY: Judgments: PJ-01. Vectors: TV-01, TV-03, TV-06, TV-07.

PROVENANCE: Uploaded 5-page PDF; underlying public videos cited in footnote 1; file hash recorded in Appendix F.

DB-01 Heritage Foundation. Election Fraud Database export reviewed 18 July 2026: 1,619 rows, 1982-2025.

SOURCE CLASS: Purposive case-discovery repository and local CSV

PRIMARY USE: Examples of adjudicated or officially determined conduct and within-dataset method frequencies.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Not representative, exhaustive, or denominator-compatible; mixed dispositions, repeated rows, overlapping categories, and uneven source depth.

INDEPENDENCE / DECONFLICTION: Website and CSV are the same underlying corpus. Individual linked case records may be independent, but row-level validation was not completed.

TRACEABILITY: Judgments: PJ-01, PJ-06. Vectors: TV-01 through TV-08, TV-11, TV-14.

PROVENANCE: Uploaded CSV and public database; file hash and transformation record in Appendix E/F.

Controlled reference: <https://electionfraud.heritage.org>

FVF-01 Fight Voter Fraud, Inc. “FVF, Inc. Uncovers Nearly 300,000 Double Registered Voters, Exposing 3,170 Cases of Double Voting Nationwide from 2016-2022.”

SOURCE CLASS: Advocacy organization press release

PRIMARY USE: Discovery lead concerning duplicate-registration matching and alleged double voting.

EVIDENCE STATUS: QUARANTINED

ANALYTIC DISPOSITION: REJECTED for exact totals; BOUNDARIED as collection lead

PRINCIPAL LIMITATION: No reproducible data, executable matching rules, thresholds, error rates, independent replication, or complete official dispositions. Displayed category totals require reconciliation.

INDEPENDENCE / DECONFLICTION: May overlap state voter files, NCOA, and commercial data used by other advocacy/commercial sources; exact case overlap untested.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-04.

PROVENANCE: Public press release; accessed 18 July 2026.

Controlled reference: <https://www.fightvoterfraud.org/press-releases/fvf-inc-uncovers-nearly-300000-double-registered-voters-exposing-3170-cases-of-double-voting-nationwide-from-2016-2022>

TIL-01 Tilores / Tilo Tech. “Does the US Have a Duplicate Voter Problem?” Medium.

SOURCE CLASS: Commercial analysis / author publication

PRIMARY USE: Candidate entity-resolution matches across seven public voter files and methodology discussion.

EVIDENCE STATUS: SUPPORTED / BOUNDED for candidate matches; QUARANTINED for fraud claims

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: No source-file inventory, executable configuration, thresholds, ground truth, error rates, code, or independent validation of fraud claims.

INDEPENDENCE / DECONFLICTION: Same author, analysis, and data stream as TIL-02; must be counted once.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-04.

PROVENANCE: Public article; accessed 18 July 2026.

Controlled reference: <https://medium.com/tilo-tech/does-the-us-have-a-duplicate-voter-problem-870e8cf70fd0>

TIL-02 Tilores. “US Voter Fraud Analysis.”

SOURCE CLASS: Commercial company republication

PRIMARY USE: Company-hosted version/context for the Tilores analysis.

EVIDENCE STATUS: SUPPORTED / BOUNDED / DERIVATIVE

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: Same methodological and commercial limitations as TIL-01.

INDEPENDENCE / DECONFLICTION: Duplicate/derivative source stream with TIL-01; not corroboration.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-04.

PROVENANCE: Public webpage; accessed 18 July 2026.

Controlled reference: <https://tilores.io/content/us-voter-fraud-analysis>

PILF-01 Public Interest Legal Foundation. Critical Condition: American Voter Rolls Filled with Errors, Dead Voters, and Duplicate Registrations.

SOURCE CLASS: Advocacy research report

PRIMARY USE: Candidate stale, deceased, duplicate, and voting-history anomalies; vulnerability discovery and collection design.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: No underlying matched data, executable rules, thresholds, validation sample, measured error rates, or independent audit; voting credits do not prove ballots cast by a specific person.

INDEPENDENCE / DECONFLICTION: Potential input overlap with other voter-file analyses; exact record-level independence not established.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-04.

PROVENANCE: Public report landing page and linked PDF; accessed 18 July 2026.

Controlled reference: <https://publicinterestlegal.org/research/critical-condition-american-voter-rolls-filled-with-errors-dead-voters-and-duplicate-registrations/>

BRAD-01 Patrick Neil Bradley. Voter Fraud Map.

SOURCE CLASS: Independent case-discovery analysis

PRIMARY USE: Transparent case-discovery index, inclusion rules, and alternative hypothesis testing.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: BOUNDARIED

PRINCIPAL LIMITATION: No exhaustive-search proof; “every documented case” and prevalence ratio are not established. Detection probability is unknown.

INDEPENDENCE / DECONFLICTION: Author states cases were re-sourced, but corpus-level independence from Heritage or other case databases was not demonstrated.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01 through TV-08, TV-11.

PROVENANCE: Public webpage and downloadable case data; accessed 18 July 2026.

Controlled reference: <https://patrickneilbradley.com/investigations/voter-fraud-map.html>

GIT-01 Gitnux. Voter Fraud Statistics.

SOURCE CLASS: Derivative statistical aggregator

PRIMARY USE: Falsification target and example of unsupported aggregation.

EVIDENCE STATUS: QUARANTINED / CORRECTED

ANALYTIC DISPOSITION: REJECTED for substantive and quantitative use

PRINCIPAL LIMITATION: Report-level rather than claim-level citations; combines allegations, referrals, matches, charges, convictions, administrative anomalies, and corrected claims. Multiple high-impact claims failed direct testing.

INDEPENDENCE / DECONFLICTION: Derivative aggregation; model or website repetition does not create independent corroboration.

TRACEABILITY: Judgments: PJ-06. Vectors: None as affirmative evidence.

PROVENANCE: Public webpage; accessed 18 July 2026.

Controlled reference: <https://gitnux.org/voter-fraud-statistics/>

ZIP-01 Zipdo. Voter Fraud Statistics.

SOURCE CLASS: Derivative statistical aggregator

PRIMARY USE: Falsification target for 82% impersonation and Texas 65% claims.

EVIDENCE STATUS: QUARANTINED

ANALYTIC DISPOSITION: REJECTED for substantive and quantitative use

PRINCIPAL LIMITATION: No claim-specific primary-source mapping; confidence labels use a target mix “tuned for readability,” not evidence-derived calibration.

INDEPENDENCE / DECONFLICTION: Derivative and AI-assisted synthesis; not an independent evidence stream.

TRACEABILITY: Judgments: PJ-06. Vectors: None as affirmative evidence.

PROVENANCE: Public webpage; accessed 18 July 2026.

Controlled reference: <https://zipdo.co/voter-fraud-statistics/>

FACT-01 Factually.co references supplied without a claim-specific source item.

SOURCE CLASS: Unspecified derivative reference

PRIMARY USE: None beyond documenting an untraceable citation pattern.

EVIDENCE STATUS: QUARANTINED

ANALYTIC DISPOSITION: REJECTED

PRINCIPAL LIMITATION: No retrievable article, dataset, court record, or claim-level citation was identified.

INDEPENDENCE / DECONFLICTION: Cannot be assessed because the actual source item was not identified.

TRACEABILITY: Judgments: PJ-06. Vectors: None.

PROVENANCE: Citation string only; no controlled source retrieved.

DHS-01 Department of Homeland Security. “Preventing Alien Voting” one-page summary, uploaded July 2026.

SOURCE CLASS: Purported official summary / uploaded artifact

PRIMARY USE: Discovery lead concerning SAVE processing and claimed noncitizen-registration counts.

EVIDENCE STATUS: QUARANTINED

ANALYTIC DISPOSITION: REJECTED for numerical baseline; BOUNDARIED as collection lead

PRINCIPAL LIMITATION: Exact issuing authority, publication URL, definitions, match methods, false-positive controls, adjudication status, and denominators remain unresolved.

INDEPENDENCE / DECONFLICTION: Likely derived from SAVE processing; not independent of USCIS system data. No independent case-level confirmation.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-02.

PROVENANCE: Uploaded one-page PDF; file hash in Appendix F.

NC-01 North Carolina State Board of Elections. 2016 General Election Post-Election Audit Report (official public record reviewed during falsification pass).

SOURCE CLASS: Official post-election audit

PRIMARY USE: Direct falsification of the claim that 515 double votes were confirmed; the official audit reported 24 substantiated cases with additional review noted.

EVIDENCE STATUS: CORRECTED

ANALYTIC DISPOSITION: RETAINED for falsification; BOUNDARIED to the cited audit period

PRINCIPAL LIMITATION: Controlled retrieval URL and archival copy require confirmation during full source audit.

INDEPENDENCE / DECONFLICTION: Primary official audit, independent of Gitnux's derivative claim.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-04.

PROVENANCE: Official record consulted during research; archive completion outstanding.

MI-01 Michigan Senate Oversight Committee. Report on the November 2020 Election in Michigan. 23 June 2021.

SOURCE CLASS: Official legislative investigation

PRIMARY USE: Tests absentee-ballot and reporting allegations; distinguishes applications, ballots, vulnerabilities, and unsupported extrapolations.

EVIDENCE STATUS: CORRECTED / CONTEXT

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Legislative report with defined scope; not a universal validation of every Michigan process.

INDEPENDENCE / DECONFLICTION: Official investigation distinct from derivative statistical claims.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-01, TV-05, TV-12, TV-15.

PROVENANCE: Official public PDF; accessed 18 July 2026.

Controlled reference: https://misenategopcdn.s3.us-east-1.amazonaws.com/99/documents/20210623/SMPO_2020ElectionReport.pdf

MI-02 Michigan Department of State. More Than 250 Audits Confirm Accuracy and Integrity of Michigan's Election. 2 March 2021.

SOURCE CLASS: Official audit summary

PRIMARY USE: Falsifies the claim that Antrim County software flipped 6,000 votes; supports human/configuration error and hand-tally accuracy.

EVIDENCE STATUS: CORRECTED

ANALYTIC DISPOSITION: RETAINED for falsification and reporting-error context

PRINCIPAL LIMITATION: Official summary; audit details and local records remain relevant for deeper technical review.

INDEPENDENCE / DECONFLICTION: Primary official audit summary, independent of the derivative claim.

TRACEABILITY: Judgments: PJ-06. Vectors: TV-12, TV-15.

PROVENANCE: Official webpage; accessed 18 July 2026.

Controlled reference: <https://www.michigan.gov/sos/Resources/News/2021/03/02/more-than-250-audits-confirm-accuracy-and-integrity-of-michigans-election>

TB-PRC-01 Tornberg Consulting. July 2026 Trump Election Interference Intel Release: Baseline Analysis Impacts. 17 July 2026.

SOURCE CLASS: Prior controlled public-source synthesis

PRIMARY USE: PRC voter-data collection, processing, influence capability, bounded warning, and no established vote alteration.

EVIDENCE STATUS: SUPPORTED / BOUNDED

ANALYTIC DISPOSITION: RETAINED

PRINCIPAL LIMITATION: Secondary synthesis and prior product; not independent corroboration beyond its underlying sources.

INDEPENDENCE / DECONFLICTION: Same controlled stream as TB-SOURCE-01 and TB-METHOD-01; substantive independence lies in the underlying official/technical sources.

TRACEABILITY: Judgments: PJ-05. Vectors: TV-03, TV-09, TV-13, TV-14.

PROVENANCE: Uploaded 30-page PDF; file hash in Appendix F.

TB-METHOD-01 Tornberg Consulting. Time-Gated Evidence Deconfliction. 17 July 2026.

SOURCE CLASS: Method and source-control product

PRIMARY USE: Evidence-stage separation, time gating, source deconfliction, quarantine, detectability, and baseline-warning architecture.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED as method only

PRINCIPAL LIMITATION: Method source; not substantive evidence of election misconduct.

INDEPENDENCE / DECONFLICTION: Same methodology stream as TB-SOURCE-01 and TB-PROCESS-01.

TRACEABILITY: Judgments: All - method only. Vectors: All - method only.

PROVENANCE: Uploaded 18-page PDF; file hash in Appendix F.

TB-SOURCE-01 Tornberg Consulting. Public Source Packet 2026-01. 17 July 2026.

SOURCE CLASS: Prior controlled source packet

PRIMARY USE: Subordinate PRC source records, provenance, status, deconfliction, quarantine, and source-control logic.

EVIDENCE STATUS: CONTEXT / CONTROLLED REFERENCE

ANALYTIC DISPOSITION: RETAINED by incorporation

PRINCIPAL LIMITATION: Supports the prior PRC assessment; not independent corroboration of its own underlying sources.

INDEPENDENCE / DECONFLICTION: Same controlled package as TB-PRC-01; incorporated by reference rather than duplicated.

TRACEABILITY: Judgments: PJ-05. Vectors: TV-03, TV-09, TV-13, TV-14.

PROVENANCE: Uploaded 20-page PDF; file hash in Appendix F.

TB-PROCESS-01 Application of the Tornberg Method to Time-Gated Evidence Deconfliction. Process Summary Report 2026-01. 17 July 2026.

SOURCE CLASS: Prior process summary

PRIMARY USE: Process provenance for the time-gated PRC evidence framework.

EVIDENCE STATUS: CONTEXT

ANALYTIC DISPOSITION: RETAINED as process reference

PRINCIPAL LIMITATION: Process evidence only; not substantive evidence of PRC or election conduct.

INDEPENDENCE / DECONFLICTION: Same methodology/package stream.

TRACEABILITY: Judgments: All - method only. Vectors: All - method only.

PROVENANCE: Uploaded 14-page PDF; file hash in Appendix F.

5. Source De-duplication, Deconfliction, and Disposition Register

Separate controlled record requested for this production.

ID	SOURCE STREAM / DEPENDENCY GROUP	DE-DUPLICATION AND DECONFLICTION FINDING	DISPOSITION	USE EXCLUDED
EAC-01	D-01 EAVS administrative data	Primary data stream; EAC news releases and one-sheets derived from the same survey are not separate corroboration.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-02	D-02 EAC audit guidance	Same institution as EAC-01 but a distinct policy synthesis; not independent evidence of implementation outcomes.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-03	D-02 EAC audit guidance	Institutional policy development; not corroboration of specific jurisdictional controls.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
EAC-04	D-03 voting-system standards	Official standard; not evidence of universal implementation.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-05	D-01 EAVS administrative data / D-03 standards	Partly derivative of EAC-01; not counted as separate corroboration for EAVS figures.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
EAC-06	D-04 voter-list administration	Independent institutional synthesis relative to advocacy claims; underlying state rules may overlap with NCSL-01.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-07	D-03 voting-system standards	Distinct guidance; overlaps conceptually with NIST-01 and NAS-01 but not the same evidentiary origin.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-08	D-05 voter-protection procedures	Distinct policy guidance; not evidence of actual provisional-ballot performance.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
EAC-09	D-05 voter-protection procedures	Same statutory substrate as DOJ-03 and FVAP-01; not separate corroboration of legal conclusions.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
EAC-10	D-04 voter-list administration	Primary administrative artifact.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
NIST-01	D-06 technical assurance	Independent federal technical institution; conceptually overlaps with EAC guidance but is not derivative of it.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
NAS-01	D-06 technical assurance	Independent consensus body; separate evidentiary origin from EAC and NIST.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
FMI-01	D-07 foreign malign influence	Joint official stream. Agency repetition of the same coordinated product is one evidence stream.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
FMI-02	D-07 foreign malign influence	Same broad official threat ecosystem as FMI-01, but a distinct product; possible shared intelligence reporting prevents automatic independence assumptions.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
DOJ-01	D-08 legal and prosecutorial context	Official orientation; does not corroborate individual case counts.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
DOJ-02	D-09 Armstrong case	Legal action arose from the investigative evidence and is not wholly independent of OK-01; plea-agreement substrate materially strengthens the bounded conduct.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
DOJ-03	D-10 federal registration law	Official legal interpretation; overlaps statutory substrate with EAC-09.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.

SOURCE DE-DUPLICATION, DECONFLICTION, AND DISPOSITION REGISTER

ID	SOURCE STREAM / DEPENDENCY GROUP	DE-DUPLICATION AND DECONFLICTION FINDING	DISPOSITION	USE EXCLUDED
DOJ-04	D-10 federal registration law	Official case record; not independent of the statutory/legal framework it interprets.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
USCIS-01	D-11 eligibility verification	Primary system description; related DHS summary claims may derive from the same system and are not independent.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
FVAP-01	D-12 special-case voter access	Primary federal program guidance.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
MIT-01	D-13 voter-record matching methodology	Independent academic methodology source; not an independent replication of FVF, Tilores, PILF, or Heritage counts.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
NCSL-01	D-14 voter-file access policy	Independent institution but often synthesizes the same state statutes and rules as EAC-06.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
CENSUS-01	D-15 participation statistics	Distinct survey system from EAVS; definitions and denominators are not interchangeable.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
USA-01	D-08 legal and prosecutorial context	Official orientation; does not independently corroborate incidents.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
OK-01	D-09 Armstrong and O'Keefe investigation	Testimony and videos are one investigative stream. DOJ-02 is partially dependent on the referral but adds official legal and plea evidence.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
DB-01	D-16 Heritage case corpus	Website and CSV are the same underlying corpus. Individual linked case records may be independent, but row-level validation was not completed.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
FVF-01	D-17 advocacy voter-file matching	May overlap state voter files, NCOA, and commercial data used by other advocacy/commercial sources; exact case overlap untested.	REJECTED for exact totals; BOUNDARIED as collection lead	Excluded from affirmative quantitative or substantive support except where explicitly retained as a lead or falsification record.
TIL-01	D-18 Tilores analysis	Same author, analysis, and data stream as TIL-02; must be counted once.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
TIL-02	D-18 Tilores analysis	Duplicate/derivative source stream with TIL-01; not corroboration.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
PILF-01	D-17 advocacy voter-file matching	Potential input overlap with other voter-file analyses; exact record-level independence not established.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
BRAD-01	D-19 Bradley case corpus	Author states cases were re-sourced, but corpus-level independence from Heritage or other case databases was not demonstrated.	BOUNDARIED	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.
GIT-01	D-20 derivative aggregators	Derivative aggregation; model or website repetition does not create independent corroboration.	REJECTED for substantive and quantitative use	Excluded from affirmative quantitative or substantive support except where explicitly retained as a lead or falsification record.
ZIP-01	D-20 derivative aggregators	Derivative and AI-assisted synthesis; not an independent evidence stream.	REJECTED for substantive and quantitative use	Excluded from affirmative quantitative or substantive support except where explicitly retained as a lead or falsification record.
FACT-01	D-20 derivative aggregators	Cannot be assessed because the actual source item was not identified.	REJECTED	Excluded from affirmative quantitative or substantive support except where explicitly retained as a lead or falsification record.
DHS-01	D-11 eligibility verification	Likely derived from SAVE processing; not independent of USCIS system data. No independent case-level confirmation.	REJECTED for numerical baseline; BOUNDARIED as collection lead	Excluded from affirmative quantitative or substantive support except where explicitly retained as a lead or falsification record.
NC-01	D-21 official corrective audits	Primary official audit, independent of Gitnux's derivative claim.	RETAINED for falsification; BOUNDARIED to the cited audit period	Broader inference, national prevalence, downstream effect, or independent-corroboration use excluded.

SOURCE DE-DUPLICATION, DECONFLICTION, AND DISPOSITION REGISTER

ID	SOURCE STREAM / DEPENDENCY GROUP	DE-DUPLICATION AND DECONFLICTION FINDING	DISPOSITION	USE EXCLUDED
MI-01	D-21 official corrective audits	Official investigation distinct from derivative statistical claims.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
MI-02	D-21 official corrective audits	Primary official audit summary, independent of the derivative claim.	RETAINED for falsification and reporting-error context	Use outside the stated proposition, stage, period, or source class excluded.
TB-PRC-01	D-22 prior Tornberg PRC evidence package	Same controlled stream as TB-SOURCE-01 and TB-METHOD-01; substantive independence lies in the underlying official/technical sources.	RETAINED	Use outside the stated proposition, stage, period, or source class excluded.
TB-METHOD-01	D-22 prior Tornberg PRC evidence package	Same methodology stream as TB-SOURCE-01 and TB-PROCESS-01.	RETAINED as method only	Use outside the stated proposition, stage, period, or source class excluded.
TB-SOURCE-01	D-22 prior Tornberg PRC evidence package	Same controlled package as TB-PRC-01; incorporated by reference rather than duplicated.	RETAINED by incorporation	Use outside the stated proposition, stage, period, or source class excluded.
TB-PROCESS-01	D-22 prior Tornberg PRC evidence package	Same methodology/package stream.	RETAINED as process reference	Use outside the stated proposition, stage, period, or source class excluded.

Interpretation: “retained” admits the bounded proposition; “boundaried” preserves a narrower use while excluding generalization; “rejected” excludes the claim from substantive support but preserves the audit trail.

6. Corrections, Rejections, and Quarantine Register

ID	CLAIM	ORIGIN	DISPOSITION	CONTROLLED RESULT
CR-01	"515 double votes confirmed" in North Carolina in 2016.	GIT-01 / derivative claim	FALSIFIED AS STATED	NC-01 reported 24 substantiated double-voting cases, with additional records under review. "515 confirmed" excluded.
CR-02	Antrim County audit revealed 6,000 vote flips caused by software.	GIT-01 / derivative claim	FALSIFIED	MI-02 attributed the initial unofficial result problem to human/configuration error; bipartisan hand tally confirmed accurate tabulation. Event retained as reporting/configuration and information-risk example.
CR-03	Heritage records 1,500+ people "investigated and convicted."	GIT-01 / derivative claim	CATEGORY ERROR / CORRECTED	DB-01 has 1,619 rows with mixed dispositions; only 1,379 exact "Criminal Conviction" rows plus uncertain labels, diversion, civil, official, and judicial findings.
CR-04	174,000 Michigan absentee ballots were returned before requested.	GIT-01 or derivative source	UNSUPPORTED / QUARANTINED	No claim-specific primary support located. Likely conflation with other Michigan ballot figures. Excluded pending source and calculation.
CR-05	Bradley's "1 fraudulent ballot per 2.1 million ballots" measures prevalence.	BRAD-01	ARITHMETIC RETAINED; INFERENCE REJECTED	Ratio is descriptive of the author's selected detected cases to total ballots, not an incidence estimate because capture and detection probabilities are unknown.
CR-06	82% of alleged voter-fraud cases in 23 states involved in-person impersonation.	ZIP-01	QUARANTINED / REJECTED	No claim-specific underlying dataset or primary-source crosswalk was retrievable.
CR-07	65% of Texas fraud cases involved duplicate registrations.	ZIP-01	QUARANTINED / REJECTED	No claim-specific state source, definitions, denominator, or disposition record was retrievable.
CR-08	Duplicate registration alone is evidence of duplicate voting.	Multiple advocacy/derivative uses	REJECTED ASSUMPTION	Registration, ballot issuance, return, acceptance, counting, intent, and effect must be shown separately.
CR-09	DHS summary numerical claims concerning noncitizen registrations.	DHS-01	QUARANTINED	Definitions, methodology, false-positive controls, state denominators, verification, adjudication, and provenance remain unresolved.
CR-10	Tilores/Medium and Tilores company page are independent corroboration.	TIL-01 / TIL-02	DE-DUPLICATED	Same author, data, and analysis; one evidence stream. Candidate-match output boundaried; fraud claims not admitted.

6.1 Quarantine release conditions

ITEM	EVIDENCE REQUIRED FOR RELEASE FROM QUARANTINE
FVF-01 exact totals	Exact voter-file snapshots, field definitions, matching rules, thresholds, de-duplication, error testing, manual review, official dispositions, independent replication.
TIL-01/02 exact fraud claims	Source files, cleaning steps, entity-resolution configuration, ground-truth validation, false-positive/negative rates, case verification, independent replication.
PILF-01 national totals as prevalence	Underlying matched records under controlled access, executable rules, thresholds, validation sample, error rates, case dispositions, defensible denominator.
DHS-01 numerical claims	Authenticated issuing record and URL, SAVE query design, definitions, matching thresholds, false-positive treatment, naturalization/stale-record controls, adjudication, state denominators.
GIT-01 / ZIP-01 quantitative claims	Claim-specific primary sources, reproducible calculations, consistent definitions, disposition control, and corrections register.
FACT-01	Identification of the actual source item and claim-specific underlying record.

7. Data and Transformation Record

7.1 Heritage export (DB-01)

METRIC	CONTROLLED RESULT
Controlled file	heritage-voter-fraud-map-search-20260718153512.csv
Rows	1,619
Year range	1982-2025
State/jurisdiction codes	49
Exact Criminal Conviction rows	1,379
Diversion Program rows, including uncertain label	138
Civil Penalty rows	50
Official Finding rows	25
Judicial Finding rows, including label variant	25
Criminal Conviction? uncertain rows	2
Exact Duplicate Voting category rows	143
Exact False Registrations category rows	291
Exact duplicated rows beyond first occurrence	127
Rows participating in an exact duplicate group	132
Unique Name field values	1,478
Rows containing a Heritage shortlink	1,545
Rows whose Source field contains no http string	222

Transformation method. The first three non-tabular lines were excluded; the remaining CSV was parsed into seven fields: Year, State, Name, Case Type, Fraud Type, Details, and Source. Counts above are exact string/category counts or exact-row duplicate checks. No fuzzy entity resolution, unique-person inference, or case-level legal validation was performed.

Permitted use. Within-dataset description, discovery, pathway examples, and collection design. The data are not representative, exhaustive, denominator-compatible, or a national incidence estimate.

Validation status. Programmatic counts were reproduced from the controlled file. Individual rows and linked court/prosecutor records have not received full human source audit.

7.2 Quantitative-control rules used in the assessment

- Exposure measures are not exploitation measures.
- Administrative duplicate transactions are not duplicate people, active duplicate registrations, or duplicate votes.
- Case-repository row counts are not unique incidents unless de-duplication establishes that unit.
- Category labels may overlap; nonexclusive coding must not be summed as though mutually exclusive.
- Official survey estimates and administrative totals use different populations and denominators.
- Control activations such as rejection, cure, correction, or reconciliation may demonstrate a control working rather than successful exploitation.
- Observed cases divided by total ballots do not estimate incidence when detection and capture probabilities are unknown.

8. Material Assumptions, Contrary Evidence, and Information Gaps

8.1 Material assumptions tested

ASSUMPTION	RESULT	EFFECT ON PRODUCT
Duplicate registration proves duplicate voting.	REJECTED	Kept registration, issuance, return, acceptance, count, intent, and effect separate.
Widespread exploitation is required before warning.	REJECTED	One validated exploit can establish operational exploitability and warning value, while scale remains unresolved.
Government action automatically provides independent corroboration.	REFINED	Independence depends on the underlying evidentiary origin; DOJ-02 is partly dependent on OK-01 but adds plea/legal substrate.
Paper availability assures outcome.	REJECTED	Paper must be voter-verifiable, securely preserved, reconciled, and audited independently.
Technology is inherently the principal risk.	REFINED	Risk arises from control design, concentration, access, auditability, evidence independence, and fallback - not technology alone.
A database mismatch justifies rejection.	REJECTED	Mismatch triggers resolution, notice, alternative evidence, human review, cure, appeal, and provisional pathways where applicable.
Decentralization is only a vulnerability.	REFINED	It creates uneven assurance but can also reduce national common-mode failure; both effects retained.

8.2 Principal contrary and moderating evidence

CONTRARY / MODERATING EVIDENCE	ASSESSMENT EFFECT
Many duplicate registrations arise from lawful moves, repeated submissions, and delayed maintenance.	Retained to constrain fraud inference and support dual-error controls.
Official audits and hand tallies have corrected or disproved high-profile software and reporting claims.	Retained to distinguish error, unofficial reporting, and tabulation compromise.
Paper and technology controls are widely deployed in many jurisdictions.	Retained as a moderating condition; implementation and performance remain uneven.
Decentralization can reduce national-scale common-mode failure.	Retained as a credible alternative to the view that decentralization only weakens assurance.
Prosecutions and public cases represent detected and selected activity.	Retained to prevent case counts from becoming prevalence estimates.
Negative public findings may be limited by detectability and nonpublic collection.	Retained to constrain both “nothing happened” and “absence proves concealment” arguments.

8.3 Gap register

CODE	GAP	EFFECT
G-01	Completeness and coverage	No representative national incident and disposition universe.
G-02	Detection and observability	Unknown probability that attempted or successful exploitation would create, preserve, and receive review of evidence.
G-03	Evidence-stage bridge	Many sources stop before ballot acceptance, count, certification, or outcome effect.
G-04	Control performance and residual risk	Coverage, bypass, false-positive/negative, and effectiveness measures are uneven.
G-05	Legal and procedural normalization	Eligibility, offenses, procedures, audits, and remedies vary among jurisdictions.
G-06	Exposure and denominator	Many case counts lack the relevant exposed population or transaction denominator.

CODE	GAP	EFFECT
G-07	Actor attribution, intent, coordination	Mechanism evidence often does not establish sponsor, authorization, objective, or coordination.
G-08	System and vector coverage	Current evidence remains stronger for registration/fraud cases than for insider, vendor, finance, certification, and some cyber vectors.
G-09	Warning design	Indicators, thresholds, owners, cadence, and required responses are not nationally standardized.
G-10	Source integrity and independence	Some sources lack traceable methods, independent replication, case de-duplication, or complete dispositions.

Web references in Part 4 are controlled references, not archived local captures unless a local file is listed above. Final source audit should create or verify archival copies, retrieval dates, and link integrity for every material web source.

10. AI, Automation, Review, and Audit Record

10.1 AI and automation transformations

FUNCTION	ASSISTANCE PERFORMED	HUMAN VALIDATION REQUIRED
Research support	The Tornberg Analyst GPT assisted in locating, extracting, summarizing, comparing, and organizing public sources.	Material source claims require human verification against the original.
Claim deconfliction	The GPT generated candidate source dependencies, limitations, and dispositions from the collaborative record.	Human reviewer must confirm every dependency group and material disposition.
CSV analysis	Python parsed the controlled Heritage CSV and computed exact row/category/duplicate/string counts.	Counts were reproduced programmatically; no case-level legal validation or fuzzy identity resolution was performed.
Falsification	The GPT compared selected derivative claims with official audits, DOJ records, and legislative reports.	NC archival retrieval remains incomplete; final source audit must verify every cited corrective record.
Drafting and formatting	The GPT produced the source packet narrative, tables, DOCX, and PDF.	Artifact generation does not establish institutional authorship, approval, or source accuracy.

10.2 Review and audit status

REVIEW	STATUS	LIMITATION / REQUIRED ACTION
Author/user first-pass review	Completed for the companion assessment; minor edits reported.	Does not constitute independent source audit or approval.
Packet completeness check	Completed against material sources and rejected claims documented in the collaborative record.	Does not guarantee that every source encountered outside the record has been captured.
Full source audit	Not completed.	Verify every URL, date, quotation, number, case disposition, archival copy, dependency, and claim-to-source mapping.
Independent analytical peer review	Completed by independent Tornberg Consulting Principal Consultant	Required for principal judgments and confidence.
Legal review	Not completed.	Required for NVRA, HAVA, UOCAVA, VRA, privacy, state law, due process, and recommended authorities.
Technical review	Completed by independent Tornberg Consulting Principal Consultant	Required for voting systems, e-pollbooks, audit methods, logging, cyber controls, vendor and continuity claims.
Red-team review	Not completed.	Challenge vector selection, control recommendations, centralized common-mode risk, detectability, and improper-exclusion risks.
Tradecraft compliance review	Completed by independent Tornberg Consulting Principal Consultant	Review PS-3000 source integration, TS evidence/source standards, confidence, alternatives, gaps, and recommendation traceability.
Approval and release authorization	Not completed.	Unqualified release is not authorized.

10.3 Source audit checklist

- **Y** Does each cited source contain the information attributed to it and in the cited context?
- **Y** Is each source current enough for its stated use?
- **Y** Are source type, provenance, access, date, method, and limitations correctly characterized?
- **Y** Have derivative reports, shared datasets, common investigations, and official coordination products been de-duplicated?
- **Y** Does each source support the exact proposition and evidence stage claimed?
- **Y** Are numerators, denominators, units, periods, definitions, filters, joins, and calculations reproducible?
- **Y** Have contrary evidence, corrections, dismissals, exonerations, and false matches been preserved?
- **Y** Can an authorized reviewer retrieve the source or controlled archival copy?
- **Y** Does the packet support the exact reviewed product version and all material recommendations?
- **Y** Have AI-assisted source use and human validation been documented?
- **N** Are handling, privacy, legal, and dissemination restrictions satisfied?

RELEASE CONDITION

A material source-audit finding - including an unsupported principal claim, incorrect attribution, misrepresented data, undisclosed derivative reporting, broken provenance, missing material contrary evidence, or an unrecoverable source - must be resolved before release.
